

Casey (Casey) Hird

CPSC 4150/6150 Spring 2021

My degree program and class year are:

I'm a math major with a CS minor and I'm a senior.

What's the most interesting place you've traveled to already, and where is one place you'd like to visit in the next 5 years

I've been to London, which was a very cool place to travel, and if Covid isn't too bad this summer (fingers crossed) my friend and I are going to backpack across Europe, starting from Portugal and ending in Paris, so we should see lots of cool places.

One time a mobile device impacted me in a really bad way:

Every time I take 5 min break in studying to look at my phone it lasts 30 min.

What's one of your goals for 2021

Get into a good math Phd program.

What are your main goals for taking this course?

I want to learn some applicable mobile development so that the next time my friends and I have some idea and say "yo we should make an app" we can actually do it.

Where will you located for Spring 2021 (e.g. Clemson, Grand Rapids, MI)

I'm in Clemson.

Who is one other person in the class that you know and what is one interesting fact about him/her/them?

Jacob Madsen, Josh Norman, and I are all in the same professional fraternity for engineering and CS (which I joined back when I was an engineering major).
